EVOLUTIONS

PRESENT ATOMIC BATTERIES

Technical Characteristics.

Volts	2.7-9.0
m/Amps	0.100-0.400
Size	AAA.AA.A
Protect	IP68

Battery life from 5 to 25 years. Totally fire safe.

Does not affect the human body! There is no irradiation for the person (the inner part of the body completely blocks 1000% of any radiation!)

If the battery is depressurized, it becomes completely radioactive! Fully protected from moisture and shock!

Produced in the so far in three standard form factors!

In the future, we plan to provide a new line of nuclear batteries for Smartphone's and other gadgets within a year!
